As a student of (b) (6) school and a citizen of Portland I believe that the health of our river is crucial. No matter how much it costs to dredge the contaminated sediment, it is worth it. It was us who polluted the river, and it is our responsibility to clean it. That is why you should stick with the original plans and clean up as much as possible. Plus the city should create laws banning the discharge of toxic chemicals into our river. The Willamette watershed is our home and it is our moral obligation to protect it.
